

INSIDER THREAT DEFENSE

Insider Threat Risk Mitigation Services

Insider Threat Risk Mitigation - Going Beyond Compliance & Traditional Security Approaches

- At ITD we address Insider Threat Risk Mitigation with a "Real World" approach using an Insider Threat Enterprise Risk Management 360 (**ITERM360™**) methodology.
- The ITERM360 approach uses a holistic, comprehensive, structured methodology that reviews a company's governance structure, security policies, security culture, critical business departments, business processes, technical and non-technical security controls for vulnerabilities and weaknesses. This approach also executes the "Insiders Playbook" of potential breach scenarios, to find holes in your security defenses, before an Insider does.
- Our ITERM360 approach has successfully helped our clients identify and mitigate very serious vulnerabilities and weaknesses, that if left unchecked could have had serious consequences.
- Words like qualitative, quantitative, metrics, risk scores, compliance, compliance requirements, security strategy, forecasting, analytics, benchmarks, etc. mean nothing to a determined malicious insider. These words also mean nothing when a security professional is briefing the CEO on how the insider threat incident happened.
- Let Insider Threat Defense identify vulnerabilities and weaknesses with your organization, before a "Malicious Insider" does.

Insider Threat Enterprise Risk Management Services

Insider Threat Defense offers a full suite of services to help your organization combat the Insider Threat;

- Insider Threat Program / Policy Development, Implementation & Management Guidance / Consulting
- Insider Threat User Activity Monitoring-Behavioral Analytic Tools (Guidance / Implementation)
- Insider Threat Risk Assessments - Penetration Testing / Gap Analysis / Mitigation Guidance)

Insider Threat Program Support Personnel Knowledge & Skills Assessment (ITSPKSA) Service™

Is your organization considering individuals for Insider Threat Program Management / Insider Threat Risk Management positions? The ITSPKSA will ensure that the individual(s) your organization is considering placing in these critical positions to protect your organizations assets, have the core knowledge and skills sets required.

Insider Threat Defense Is An Authorized Dealer For Agent Surefire Insider Threat Games™

Insider Threat Defense in partnership with MAVI Interactive is excited to announce state of the art training / gaming for security professionals that are looking to reduce "Insider Threat" risks, that can be very costly and damaging.

- The Agent Surefire Insider Threat Game is an immersive Information Assurance / Information Security training simulation (Point & Click), that will raise security professionals awareness on security best practices, and provide the knowledge to implement a defense-in-depth security posture in their organization.
- The Agent Surefire Insider Threat Game™ will allow individuals to get the "First Person Perspective" of being an Investigator / Incident Handler to identify and uncover threats, vulnerabilities and weaknesses.
- This unique real-world and interactive approach to training, will execute the "Insiders Playbook" of potential breach scenarios, and educate security professionals on how to find holes in your security defenses, before an Insider does.
